

Guy Knafo

Project Manager • Product Development • Stakeholder Management • Risk Planning

050-6239012 | knafoguy@gmail.com | Klil, Israel

SUMMARY

Project manager and industrial designer who takes defense and technology products from requirements through prototyping to serial production and delivery. Skilled in matrix leadership of up to 20 people, including engineering and procurement department heads and production-floor managers. Pairs stakeholder management and risk planning with hands-on, AI-assisted application development that has measurably cut administrative overhead and improved reporting accuracy.

KEY ACHIEVEMENTS

- ◆ **15% budget reduction** — cut team budget without delaying delivery or compromising quality.
- ◆ **30% efficiency gain** — streamlined production processes and integrated new technology on the floor.
- ◆ **20 projects, on time** — led the team to deliver a full year's project slate on schedule, exceeding targets.
- ◆ **50% fewer document errors** — built and rolled out a system that cut errors across production stages.

CORE SKILLS

Project Management: Matrix leadership · Schedule & resource planning · Risk management · Cost & quality oversight · Stakeholder management

Product Development: Product requirements (PRD) · UX/UI · User & market research · Prototyping to production

Enterprise Systems: ERP requirements & implementation support, including SAP

Digital & Design Tools: AI-assisted development · Python, Streamlit, Flask, React, TypeScript, PostgreSQL, Supabase, GitHub, Render · SolidWorks, Rhino, Illustrator, Photoshop · CNC, laser cutting, 3D printing

PROFESSIONAL EXPERIENCE

Project Manager and Head of Operations and Engineering

Moraltec, Kibbutz Shomrat • August 2022 – Present

- Lead defense and technology product projects from requirements and engineering design through prototyping, serial production, and customer delivery.
- Manage engineering and procurement department heads and production-floor managers; coordinate R&D and manufacturing across production stages, including laser cutting and painting.
- Own in-process inspections before painting and final quality inspections, maintaining full records and traceability throughout production.
- Maintain approved production files — design meeting records, order review requests, signed drawings, routing and inspection records, and certificates of conformity (COC).
- Plan schedules, resources, and costs; make technology and operational decisions with executives and clients, clarifying requirements and managing changes.

Project and Product Manager

UMASQU, Tel Aviv-Yafo • 2016 – 2020

- Managed schedules, resources, and product customization with international agents and clients; led and trained a team of 10 across CNC, laser cutting, and 3D printing.

- Defined UX/UI requirements and managed digital projects, including the company website, landing pages, and marketing campaigns.

Project and Product Development Manager

Freelance • February 2013 – February 2022

- Led product development for international brands — including Apple and Google — and private clients, from research and requirements through launch planning and production.

Team Leader

Security Unit, Ministry of Defense, President's Residence • February 2012 – May 2016

- Led 20 security personnel at the President's Residence, coordinating operations and resolving issues independently in a sensitive, high-stakes environment.

INDEPENDENT DIGITAL PROJECTS

Internal Project Management System

- Designed and built a system tailored to internal workflows and restricted internet access, centralizing project data, production routing cards, time tracking, and delivery indicators — now used daily and a measurable driver behind the reduced admin load and document error rate above.

Python · Streamlit · Excel

Employee Leave Management App

- Defined, built, and maintain an employee leave management application, including deployment and mobile-usability improvements.

Python · Flask · PostgreSQL · Supabase · GitHub · Render

ROADAR — Vehicle Selection Tool

- Built a web app for comparing pickup trucks and planning total cost of ownership, bringing vehicle data and comparisons into one interface.

React · TypeScript

EDUCATION

B.A. in Industrial Design

Hadassah College, Jerusalem | Jan 2012 – Feb 2016

Diploma in Graphic Design

TAFE NM, Perth, Australia | 2009 – 2010

MILITARY SERVICE

Full military service, Rifleman 07 — combat infantry, combat medic, and squad commander.
